PREFACE

The present volume is the result of work first begun in 1953. The inordinately long period it has taken until its publication is attributable largely to the circumstance that, except for a single sustained period of work in 1960, other duties and preoccupations allowed only slow and intermittent progress toward its completion. The effects of this delay are visible in inconsistencies that will be noted in the style in which the copies have been executed, and in the different methods employed for dealing with the seal inscriptions.* The attainment of a greater level of uniformity in these respects would have entailed an even longer delay in publication, and this was not deemed justified in the circumstances.

As it is, the volume could not have been ready for publication at this time without the assistance of others which it is my pleasant duty to acknowledge. Edwin C. Kingsbury provided the major assistance in the preparation of the catalogue and the indices, and in the arrangement of the plates. He also made collations and corrections which have added appreciably to the accuracy of the copies and readings. Mrs. Maria deJ. Ellis added some further improvements in the course of work on the final draft of the catalogue and indices. Research and secretarial assistance in the earlier stages of the work were provided by Miss Susan Spectorsky and Mrs. Virginia C. Jacobsen at Berkeley, California.

The inclusion of twelve tablets from the Harvard Semitic Museum in the present corpus is due to the courtesy of D. O. Edzard while he was Visiting Professor at Harvard University, and of E. I. Gordon, sometime Lecturer in Assyriology at that institution.

Here at Yale, it was Albrecht Goetze† who first suggested that I undertake the study and publication of Late Old Babylonian materials located in the Babylonian Collection. His thorough knowledge of the collection and his broad experience in all matters Old Babylonian were always at my disposal in the earlier years of this undertaking. The late Ferris J Stephens, then Curator of the Babylonian Collection, provided every courtesy for facilitating the work on the tablets in his charge and, in his characteristically self-effacing way, contributed in no small measure to the more scholarly aspects of the project. The dedication of this volume to his memory is but a token acknowledgment of my indebtedness to him in this regard as well as in numerous other connections. My colleague, William W. Hallo, current Curator of the Babylonian Collection and in charge

* No attempt has been made to deal with the figures of the impressions, many of which are of great interest for the history of Mesopotamian glyptic. They will be dealt with in a separate study by Briggs W. Buchanan. Some of them have already been published by him in the *Yale Library Gazette*, 45/2 (1970), 60 ff.

PREFACE

of the Yale Babylonian Texts series, has been most helpful in the final stages of the progress of the manuscript to the press. Abraham J. Sachs was kind enough to read through the proofs and has contributed a number of improvements.

Finally, I am glad to have this opportunity to acknowledge my debt to the John Simon Guggenheim Memorial Foundation, whose support through a fellowship enabled me to pursue work on the volume while I was at the University of California at Berkeley, and to the American Council of Learned Societies for a Grant-in-Aid which enabled me to devote a longer period of time in 1960 to further work on the volume.

It remains to be said, of course, that despite all the assistance and advice of others, the inaccuracies that inevitably remain are my own responsibility.

J. J. F.

New Haven, Connecticut

June 1970

INTRODUCTION

The 538 texts comprising the present volume, apart from the twelve texts from tablets belonging to the Harvard Semitic Museum, constitute the bulk of the tablets dating to the last four kings of the First Dynasty of Babylon located in the Babylonian Collection at Yale. Of these, by far the largest group, numbering 402 tablets, is part of the Morgan Library Collection on deposit in the Yale Babylonian Collection. The remainder belong to the Yale Babylonian Collection proper and include five tablets from the Nies Babylonian Collection. A considerable number of Morgan Library Collection tablets of the same era, about seventy in number, has not been included in the volume mainly because their fragmentary condition or poor state of preservation would have added little, if any, additional information to that supplied by the tablets here published.¹ Of the Yale Babylonian Collection material, perhaps a dozen tablets falling into the same category remain unpublished, some of them because they were discovered too late for inclusion in the volume. As far as I can determine, the Nies Babylonian Collection includes no further unpublished texts of this period. This information is of value in gaining some perspective on the sites and areas which produced Old Babylonian tablets in the heyday of private archaeological enterprise in Mesopotamia in the latter decades of the nineteenth and first two (or more) decades of the twentieth centuries, for the Morgan Library Collection tablets, or a large part of them, are known to have passed through the hands of V. Scheil² and C. H. W. Johns.³ At that time the majority of Old Babylonian tablets were coming from northern Babylonian sites, mainly from Sippar and Dilbat, with a scattering from other sites, such as Babylon and Kish. This distribution is reflected in the tablets published here, all of which derive from northern Babylonian sites. All were acquired through purchase, so that exact provenance must be ascertained on the basis of internal evidence alone.⁴ Thus the Old Babylonian tablets of the Morgan Library Collection, which came onto the market before the end of the first decade of this century, include a very large proportion of documents from Sippar, Dilbat, and

1. Also omitted was a series of tablets from the first years of Abi'ešuh, since they form part of a single archive which begins in the last years of Samsuiluna and it appeared more reasonable to have this archive ultimately published as a unit.

2. See Finkelstein, *JCS*, 11 (1957), 84 n. 7.

3. Johns, *Cuneiform Inscriptions, Chaldean, Babylonian and Assyrian Collections Contained in the Library of J. Pierpont Morgan* (New Haven, Yale University Press, 1920), pp. 7, 15, 22 ff., and 41; and see Finkelstein, *JCS*, 13 (1959), 39 n. 4.

4. For this reason no ascription of provenance is attempted in the Catalogue. The provenance will in certain instances be readily apparent from the content; in other cases it might be determinable from more detailed prosopographic analysis, or it will elude certain identification.

Kish.⁵ These documents exhibit archival affinities with published documents from other collections, such as those from Berlin published in *VS* 7-9, the early volumes in the *CT* series, and in minor collections published since the first two decades of this century. The Yale Babylonian Collection and Nies Babylonian Collection are comparatively poor in documents of this type, for at the time they were begun the northern Babylonian sources had either dried up or were abandoned by the illicit diggers in favor of other and richer veins of Old Babylonian cuneiform tablets, such as the region of Larsa and, somewhat later, the Diyala sites. As the published volumes indicate, the Old Babylonian material of the Yale Babylonian Collection and Nies Babylonian Collection derives mainly from these latter sources. Conversely, of course, the Morgan Library Collection is almost devoid of any Old Babylonian documents other than those deriving from the northern sites.

It will be noted that many undated tablets, including some letters, have been incorporated in this volume. The justification for this procedure is that internal evidence, ductus, tablet shape, or some combination of these criteria was sufficient to ascribe them to the general period with which the volume is concerned. Thus, for example, No. 470 (YBC 4975), which contains within its text a series of year-names of Samsuiluna, although the document itself is not dated, most probably was written in the time of Ammiditana or later, since it shares certain features and personal names with No. 13 (YBC 4976) dated in Ammišaduqa 1. However, a date in the reign of Samsuiluna itself cannot totally be excluded, and it is so noted in the catalogue.

The tablets comprising this volume are divided into two distinct shape patterns. The majority are in the form characteristic for the Old Babylonian period as a whole, namely, the square-edged tablet, either in the form of small square tablets or rectangular tablets of varying size. These are obviously the canonical shapes for the more or less standard types of contracts and legal documents that go back to the beginnings of the Old Babylonian period and are carried forward, with only slight modifications, down to the end of the period of the First Dynasty, and into the Kassite period.⁶

The second type, comprising over 130 tablets, or more than one-fifth of the total number included in this volume, is of a distinctly different shape, exhibiting the following features: (1) there is little difference in curvature as between observe and reverse; (2) the maximum thickness of the tablet is located at the center and diminishes markedly

5. That a considerable number of these tablets come from Kish may be concluded from MLC 1725, an unpublished letter of Samsuditana to the burgomaster (*rabiānu*) of Kish and the "Secretary of the Army" (DUB.SAR ERIM) who are explicitly stated to reside in Kish (*ša i-na Kiši^{kī} wa-aš-bu*). The body of this letter is unfortunately almost completely lost. The letter had a sealed envelope, a fragment of which still adheres to the uninscribed reverse. It is therefore not impossible that it was opened at the time it reached its destination, and ultimately recovered at the site of Kish.

6. In the autograph copies of these tablets the straight ruled outlines have been drawn only in a few cases (among the earliest of the copies made). Where no such lines appear, as is the case for most of the tablets, it is to be assumed that the tablets have the "standard" Old Babylonian physical characteristics.

toward the edges in every direction; (3) the edges are tapered down and rounded in contrast to the standard type where the edges are sharp and flat and hardly thinner at all than the center, while the corners are rounded rather than sharp; (4) the dimensions of the tablet are usually square or nearly so, while the standard shape is either exactly square or distinctly rectangular.⁷

The content of the tablets of this second shape is markedly different from that of the tablets of the standard shapes. The distinctive features in this respect are:

1. They almost never contain contracts or strictly legal documents of the "canonical" type, e.g. sales, loans, leases, bequests, litigations, etc., which form the standard content of Old Babylonian legal texts and their earlier Sumerian prototypes.⁸
2. The content most often consists of administrative texts of varied types, such as receipts, disbursements, ration lists and pay lists, rosters of persons, and memoranda of different kinds. The size of these tablets is extremely varied, ranging from very small examples of 2–3 cm., with two or three lines of writing, to relatively large tablets up to about 7 cm. square containing many lines of entries. A distinct category, which will be dealt with below, consists of tablets which might in general be characterized as "epistolary" in style and function.
3. Only rarely are tablets of this shape sealed. Among those published in this volume seal impressions are found on the following: Nos. 424, 534, 535 (all with the same seal), No. 457 (same seal as No. 474, a square-shaped tablet), and No. 537.

Apart from these features, it must also be noted that *no tablets of this shape, where dated, are earlier than the reign of Ammiditana*. This fact will have a bearing on still another observation concerning a subgroup within the body of "round" tablets, as we shall call them, found in this volume. This relatively large group consists of texts which we have just characterized as epistolary. It would not be exactly correct to refer to them as "letters" because only a few of them contain the full complement of formulas which have come to define the typical Old Babylonian letter and which are introductory to its content, namely, mention of addressee, the name of the writer of the letter, and a salutation or greeting. The "orthodox" letters are Nos. 102, 107, 109, 110, 114, 115, and 162.⁹ All the other tablets in this group, while clearly epistolary in nature and usually addressing someone directly, identify neither the writer nor the addressee by name.¹⁰ Two of these, Nos. 98 and 117, begin with a greeting, which is the same in both texts:

7. The outline of these tablets is drawn in every instance. It will be noted that the edges of some appear to be relatively straight while others show a more or less pronounced curve. I nevertheless consider them all to belong to the same tablet type by virtue of the tapered and rounded edges and corners, features which distinguish the entire group from the classic Old Babylonian shapes.

8. No. 106, a rental agreement for a house, appears to be the only exception to this generalization.

9. The omission of the greeting in Nos. 102, 110, and 114 is not significant since it may be occasionally omitted in Old Babylonian letters of the standard shape.

10. No. 161 is exceptional in that it is an unaddressed letter in the standard Old Babylonian shape, and begins with an unconventional salutation and blessing.

Šamaš liballitka / lu šalmāta “May Shamash preserve you, keep well.” All the rest begin directly with the matter about which the letter is concerned. In the catalogue I have classed all these texts as “unaddressed letters.”¹¹

A distinctive feature of the epistolary group, which consists of some twenty-eight tablets,¹² is that the essence of the message is typically (but not exclusively) a directive or an order to purchase and/or deliver some quantity of grain, wool, livestock, or other item, or to send silver. Sometimes the only indication that the text is such a message is the occurrence of a single verb in the imperative, e.g. *šūbilam* “deliver” (cf. Nos. 21, 475) or *idin* “give” (cf. No. 102, a normally addressed letter, and Nos. 101:14, 159). Sometimes a text appears at first to be an administrative account, and only at the end proves itself to be a message, as in the case of No. 411, where lines 18–20 indicate that the text is, in part, a response to a previous inquiry.

Perhaps a more significant phenomenon is the occurrence among these tablets of the term which F. R. Kraus has normalized as *ze'pum*,¹³ a word which is not found in texts dated earlier than the late Old Babylonian period and, specifically, not before the reign of Ammiditana. In all, Kraus records twelve occurrences of the word in previously published tablets. On the basis of a schematic analysis of external and internal indications he concludes that the term denotes “letter,” but is unable to state in what ways the term is to be distinguished semantically from *kunukkum* and *unnedukkum*, which also denote “letter.” Among our tablets the term occurs seven times:

- | | | |
|-----------|--|------------|
| a. 113:1 | <i>zé²-pí PN / uštābilakku</i> | no date |
| b. 113:6 | <i>zé²-pí / ana šibūtiya / kīl</i> | no date |
| c. 100:22 | <i>zé²<-pí>-ka šūbilam</i> | no date |
| d. 154:15 | <i>ze²-pí ana šibūtiya / kil</i> | Ammiditana |
| e. 170:4 | <i>kīma ze²-pí tāmmarū</i> | no date |
| f. 447:7 | <i>inanna zé²-pí uštābila(k)kum</i> | no date |
| g. 448:12 | <i>[kī]ma zé²-pí tāmmarū</i> | no date |

Since a and b occur on the same tablet, only six tablets are involved altogether. Of these, all except c clearly allude to the tablet in hand. The phrases in which the word occurs are identical in all respects with those previously published, with the exception of Kraus’s No. 1. In this text, which is an account of barley and beer rations covering a number of months and days, line 13, summarizing a number of entries, explains the expenditures(?) as *ša pí-i zé²-pí-tim* “in accordance with the *ze'pum*’s.” This is the only

11. For a previously published example, with a photograph of the tablet, see H. W. F. Saggs, “An Unaddressed Old Babylonian Letter,” *JCS*, 14 (1960), 56 ff., with references to earlier published tablets of the same kind. See now also D. O. Edzard, *Altbabylonische Rechts- und Wirtschaftsurkunden aus Tell ed-Der im Iraq Museum, Baghdad*, Bayerische Akademie der Wissenschaften, Philosophisch-historische Klasse, Abhandlungen, Neue Folge Heft 72 (München, 1970).

12. Nos. 21, 101–4, 108, 109, 118–17, 120–22, 133, 147, 154, 159, 162, 170, 172, 173, 411, 447, 448, 475.

13. F. R. Kraus, “Altbabylonisch *ze'pum*,” *BiOr*, 24 (1967), 12 ff.

occurrence of the plural form of the term.¹⁴ All of the tablets published here in which the term occurs are of the "round" type. The copyists of previously published tablets in which the word occurs have given no indication as to their shape. However, it is clear that Kraus's No. 8 is a letter of the round type, despite the straight borders.¹⁵ It is probable that Kraus's Nos. 5, 7, and 10–12 are also of the round type. Kraus suspected (rightly) that the meaning of *ze'pum* was connected with the external features of these tablets, but it is noteworthy that among the possible clues he completely overlooked the matter of shape. The available evidence points to the conclusion that a tablet denoted as a *ze'pum* is one of the "round" shape, as defined above. This does not imply that *all* round-shaped tablets of the Old Babylonian period were necessarily called *ze'pum*,¹⁶ although this possibility cannot be altogether excluded. From the foregoing, the following would appear to be the characteristics of a *ze'pum*:

1. It is a tablet of roughly square dimensions, with little difference in curvature between observe and reverse. In contrast with the typical square or rectangular Old Babylonian tablets with relatively thick blunt edges, the *ze'pum* tablets are tapered gently to rounded edges and corners.
2. It is typically, although not exclusively, used for letters, which may begin with the standard formulas identifying the addressee and sender, followed by a polite greeting, or may dispense with any of these or all of them and begin with the message directly. Some examples may even begin as accounts, disclosing their identity as messages only toward the end, through the use of a verb of direct address, or by some similar indication.¹⁷
3. The message typically is centered upon an order or directive to the addressee to deliver some commodity to a third party (or to the sender), or to buy some object or commodity on the authority of the sender, occasionally with the directive to the addressee to retain the *ze'pum* as evidence of this authority.

The question of an exact English translation of *ze'pum* would ordinarily center upon its etymology, which is much disputed and upon which the additional material published in this volume throws no new light. The contextual usage of the word, however, suggests that the term "draft"¹⁸ would come as close as one would wish to covering

14. Kraus is correct in rejecting the rendering "clay tags" of the *CAD* in this passage, which was the main basis for the *CAD*'s understanding of *ze'pum* in Old Babylonian sources. The passage is rather a summary of quantities (of grain) delivered in accordance with a number of individual "drafts" or "letter orders." See below.

15. The envelope of this letter is one of the few of this type extant. It bears the seal of the sender, which identifies him as the servant of Ammišaduqa. None of the letters in the present volume bears any seal impressions, and it is uncertain whether they were originally enclosed in envelopes which did bear seal impressions.

16. It should be mentioned that the tablets inscribed with extispicy reports are of exactly the same shape as those described here, and that none are dated earlier than the reign of Ammišaduqa. The genre continues into the Kassite period and then apparently disappears; cf. Goetze, *JCS*, 11 (1957), 89 ff.; and Nougayrol, "Rapports Paléo-babyloniens d'Haruspices," *JCS*, 21 (1967–69), 219 ff.

17. Whether or not *ze'pum*-tablets were sealed or had envelopes does not appear to be a distinguishing feature of the group, as Kraus has already seen.

18. Especially in the sense of "an order from one person to another directing the payment of money" (*Webster's*

the variety of documentary types which *ze'pum* could denote, so that it might in part overlap with, but not be altogether a synonym of, the terms for "letter."¹⁹

The *ze'pum*, with its specialized purposes, is not without antecedents in the cuneiform epistolary canon. It closely resembles the Ur III and early Isin "business" letters,²⁰ both as to formal features and as to content. Like the *ze'petu*, the Ur III "letters" may have the full address formula, a short formula, or none at all.²¹ The messages are typically very short, and amount to a directive or order that the addressee deliver some commodity to a third party or to the sender, or carry out some similar financial action on the sender's behalf. The most common verb found in them is *SUM* "give," in either the optative or the imperative, which corresponds to *idin* in Akkadian. In fact, the key verbs in the five Akkadian letters included in that corpus, *idin* and *šubilam/lim*, are the very ones most common in the *ze'pum* type of letter of the late Old Babylonian period. These Ur III letters have been more precisely defined as "letter orders"²² and as "bank-drafts."²³ The *ze'pum* letters are somewhat more diversified in content, but they do constitute a distinct category. In a larger sense they may be characterized as "business directives" and are to be distinguished from the mainstream of Old Babylonian letters, which cover a larger range of subjects, including political and social matters.

The tablets from Dilbat and Sippar published in this volume offer substantial additions to the information accumulated from previously published sources about the economic, social, and administrative institutions current in those cities, especially for the latter part of the Old Babylonian period. It cannot be said, however, that this new information, in terms of documentary typology or by virtue of content, departs in any significant way from what has been learned from previously published records.

New International Dictionary, 2d ed., s.v. "draft," mng. 14) which in the Mesopotamian context might rightly include staple commodities as well as silver. That it may also be pertinent in the sense of "(preliminary or informal) copy" which might provide some link to Late Babylonian *zipu* "mold, stamp, stamped object" and West Semitic cognates or derivatives, is not so certain. But since these cognates have more commonly the sense of "false document, forgery, etc." (i.e. describe an *unauthorized* use of an otherwise legal form) a development from a term that might denote something "informal" or not executed according to the normal conventions is not out of the question. The translation of *ze'pum* by "draft" may well convey this connotation.

19. I am thus not prepared to go along with Kraus's tentative suggestion that *ze'pum* may simply be the north Babylonian word corresponding to *unnedukkum* "letter" on the ground that the latter term is found only in southern Old Babylonian sources. Where the term *ze'pum* originated cannot be established, as Kraus also acknowledges, but the connotation may well lie in the area of something "unofficial" but not without legal or authoritative standing, e.g. a tablet or letter written informally (perhaps not by a professional scribe), not on a conventionally shaped tablet, and—as often as not—paying little attention to the conventional formalities of Old Babylonian letter-writing.

20. E. Sollberger, *Business and Administrative Correspondence under the Kings of Ur*, TCS, 1 (Locust Valley, N.Y., J. J. Augustin, 1966).

21. *Ibid.*, p. 6.

22. A. L. Oppenheim, *Catalogue of the Cuneiform Tablets of the Wilberforce Eames Babylonian Collection in the New York Public Library*, AOS, 32 (New Haven, American Oriental Society, 1948), p. 86 to H 24.

23. Hallo, "The Neo-Sumerian Letter-Orders," *BiOr*, 26 (1969), 172.

The case of the tablets from Kish is far different. As near as can be determined, some 116 of the present texts can be ascribed that provenance with at least a fair degree of probability. It is likely that of the tablets whose provenance remains doubtful a significant proportion will ultimately prove to derive from Kish, so that perhaps as many as one-third of the texts in this volume will prove to come from that site. This would constitute by far the largest corpus of Old Babylonian Kish texts published to date. In terms of period and archival affinities this corpus is closely related to the group of Kish tablets in the Museum of the University of Manchester²⁴ recently published by Szlechter.²⁵

The importance of this corpus lies primarily in the fact that a large part of it deals with the business and, on occasion, the professional affairs of the cult personnel attached to the temples and chapels of various deities worshipped in Kish. These include many female personnel of the well-known ranks of *ugbabtu* (NIN.DINGIR), all of whom served the god Zababa, the tutelary deity of Kish,²⁶ and the *nadītu* (LUKUR = SAL+ME), of whom only one is known from these texts to have served Zababa,²⁷ one other, already mentioned, serving Marduk of Babylon (to whom apparently a temple or chapel at Kish was dedicated).²⁸ As in Sippar, these women—or some of them, at least—lived in a sequestered compound, the *gagūm* (GÁ.GI₍₄₎.A), under the supervision of intendants (UGULA:waklum) and doorkeepers of the *gagūm*.²⁹ The relative numbers of *ugbabtu*'s and *nadītu*'s in Kish cannot be determined with any certainty, but from the extant material it would appear that the *ugbabtu* group was more prominent there than the *nadītu*. What the distinction between the two titles might have been in terms of rank or function is unknown. At all events, it is almost certainly not the case that the *ugbabtu* was the

24. Abbreviated hereafter as UMM.

25. *Tablettes juridiques et administratives de la IIIe Dynastie d'Ur et de la Ire Dynastie de Babylone, etc.*, Publications de l'Institut de Droit Romain de l'Université de Paris, 21 (Paris, Récueil Sirey, 1963). Some of these tablets were previously published in copy by Fish, in "New Ammiṣaduqa Texts," *MCS*, 2, 27 ff. and in "New Ammiditana Texts," ibid., pp. 38 ff. It should be noted that the tablets of this group were acquired by Manchester through C. H. W. Johns; see Fish's note, ibid., p. 27, and cf. note 3 above. Szlechter (p. viii) counts 21 tablets as coming from Kish. This number must be augmented by at least one more, H 41, which concerns the same *nadītu* of Marduk of Babylon as our No. 91, Tāb-esagila; cf. also Renger, "Untersuchungen zum Priestertum in der altbabylonischen Zeit," *ZA*, 58 (1967), 174 f. with n. 453. [Additional Late Old Babylonian tablets from Kish are apparently located in the Vorderasiatische Museum in Berlin. Of the three texts recently edited by H. Klengel in *JCS*, 23 (1970), 124 ff. (the copies of which are to be published in *VS* 18), VAT 5799 and VAT 6676 are definitely from Kish, and it is not excluded that VAT 6676—involving an *ugbabtu* of Marduk Babili—may also be from Kish.]

26. Only in one instance, for Bēltani in No. 90:rev. 20, is there no indication of the deity she served.

27. Dan-erēssa in 242, also acting in UMM G 59 and H 62.

28. See note 25 above. Bēlessunu in No. 323:4 is also a *nadītu* of Marduk, but the document may be from Sippar rather than from Kish.

29. Cf. No. 325:32 ff. The text, dated Ad 5, records the itemized gift or bequest by her father to the *ugbabtu* Elmešum, presumably upon her entry into the *gagūm*. In No. 91, where the woman involved is a *nadītu* of Marduk, a similar bequest or gift is explicitly called *nudunnū* (line 24), but since the text breaks off at that point it is not clear whether this was given upon her entry into the *gagūm*, or upon marriage, for it is known that the *nadītu*'s of Marduk were not excluded from marriage, although they were not to bear children (see Renger, *ZA*, 58 (1967), 174 f.).

superior of the *nadītu*'s either within or without the *gagūm*.³⁰ If we may judge from the title of the male intendants of the two classes, it may even be that the titles are in some circumstances interchangeable, for the texts offer the name of one Ilšu-bāni who was an UGULA NIN.DINGIR.MEŠ (No. 90:rev. 20, father of the *ugbabtu* Bēltani, No. 325:38, and UMM H 31:27) and at the same time an UGULA LUKUR.MEŠ (UMM G 59:16) all dated to the reign of Ammiditana except for No. 90, which is of the time of Samsuditana (date missing).³¹ Similarly, there is the case of Ruttiya, an *ugbabtu* of Zababa, who is the principal in the interesting document No. 192 (Sd 5), translated below. She may be identical with the Ruttiya identified as the *nadītu* of Zababa in UMM H 58 (pl. 44), a field lease dated in Aṣ 14, i.e. only ten years earlier. Finally, one might note in this connection the passage in tablet III of the Atra-hasīs epic, vii 6–9, which enumerates the categories of women for whom the bearing of children is forbidden: the *ugbabtu*'s, the *en(ē)tu*'s, and the *egisītu*'s.³² In a composition coming from the learned quarters of Sippar, where the *nadītu*'s play such a prominent role in the Šamaš cult and in the socio-economic life of the city, the omission of the *nadītu*'s from the passage is doubly conspicuous. Such an apparent “oversight” might well be explained if we may presume that the class of the *ugbabtu* subsumes the *nadītu* even if the two terms are not exactly synonymous.

Another item of interest in this connection is the occurrence of the title (MÍ.)ŠA.ZU =

30. Apart from the ranking of the *ugbabtum* ahead of the *nadītum* in the lexical lists, there exist no indications in the law collections of the Old Babylonian period, nor in the private documents, of the ways in which her superior position was manifested. The omens of the Old Babylonian period imply, however, that when the office of high-priestess, i.e. the *entum* (Sum. NIN.DINGIR, which is the same sumerogram as is used for *ugbabtum*), fell vacant as a result of the death of the incumbent, it was sometimes filled by the elevation of an *ugbabtum*; see, in general, Renger, *ZA*, 58 (1967), 144 f. One must note here that Mrs. Harris chooses to read NIN.DINGIR in the Laws of Hammurapi, where the title is coupled with the LUKUR (i.e. *nadītu*), as *entum*. She then tentatively proposes that the *entum* exercised the function of an “abbess” or “mother superior” (Sum. AMA.LUKUR.RA: “mother of the nadītu-women,” a title which never occurs outside early lexical lists), of the “cloister” (*gagūm*) (“The Organization and Administration of the Cloister in Ancient Babylonia,” *JESHO*, 6 [1963], 141 f.). But the NIN.DINGIR of the “codes” and other Old Babylonian documents is in fact the *ugbabtum*, not the *entum*. And since it is clear that even in Sippar there were a group of *ugbabtu*'s under an UGULA, it is ruled out that a NIN.DINGIR:*ugbabtu* could formally serve as “abbess.” It is more likely that AMA.LUKUR.RA does not denote a formal rank in the hierarchy (any more than “abbott” or “mother superior” is such a rank in the Roman Catholic hierarchy), but rather is an administrative or even honorific function which might have devolved upon any *nadītu* or *ugbabtu* by virtue of seniority or influence.

31. The seal on G 59, as read by Szlechter, is that of Ilšu-bā[ni] the ŠABRA (PA+AL) of ḫAN-M[AR.TU], son of Ilšu-ibni, servant of Ammiditana. As the office of ŠABRA is not otherwise known from these texts, it is almost certain that the second line of the seal should be read UGULA NIN!.DINGIR ḫZ[a!-ba₄-ba₄]. This individual may also be the Ilšu-bāni who figures, without title, in texts No. 30 (Aṣ 16, a field lease), and No. 36 (Aṣ 17, a loan of barley), but note that the repayment of the loan in the latter text was to be made at the *kāru* of Babylon. In Sippar, it should be noted, Ninšubur-mansum, the important UGULA of the *nadītu*-women of the time of Sin-muballit (Harris, *JESHO*, 6 [1963], 132) is once identified as the UGULA NIN.DINGIR, i.e. intendant of the *ugbabtu*-women, in a litigation of the time of Sin-muballit (Bu. 91-5-9, 2483/3a, L. Waterman, “Business Documents of the Hammurabi Period,” *AJSI*, 29 [1912–13], 191). That this was no scribal error, as Mrs. Harris suggests (*JESHO*, 6 [1963], 142), is shown by the fact that the two woman principals in this litigation are also identified as NIN.DINGIR (obv. 10, rev. 1, 4).

32. Cf. W. G. Lambert and A. R. Millard, *Atra-hasīs, The Babylonian Story of the Flood* (Oxford, 1969), pp. 102 f.

šabsūtu “midwife” for the woman Iltani, in No. 313:4, dated in Aṣ 8. This text is one of a group which shares certain formal features with a number of texts in the Manchester collection, and will be reviewed below. The fact that Iltani is so designated immediately calls to mind the passage in a literary text of the post-Old Babylonian period which reflects the view that the *nadītu*’s were known for their proficiency in midwifery.³³ Mrs. Harris³⁴ would dismiss this allusion as a totally erroneous late view. But such a statement ought not to have been dismissed out of hand. Indeed, the occurrence of a midwife named Iltani in our texts indicates that the passage should be taken seriously, for Iltani is one of the most characteristic names of *nadītu*’s in the Old Babylonian period³⁵ and, indeed, a *nadītu* of Zababa in Kish also bears this name.³⁶ The passage in Atra-ḥasī already cited above points in the same direction. For, apart from the problematical identity of the *pašittu* who is to “seize the infant from the ‘lap’ of the one who gave it birth,”³⁷ it would appear that the three classes of women there named, although prohibited from having children of their own, may vicariously experience the “joy” of childbirth by serving as the midwives at such occasions.³⁸ One might even suggest that a major theme of the epic as a whole is the glorification of the social role of the women in these variously-named “orders.”³⁹ For just as the mother-goddess Mami/Nintu was the midwife at the birth of archetypal man before the Flood so these

33. KAR 321:7: LUKUR.MEŠ (glossed *na-da-te*) ša ina ni-me-qi ū-ba-la-ṭa re-e-mu “the *nadītu*’s, who through (their) wisdom quicken the womb.”

34. “The Nadītu Woman,” *Studies Presented to A. Leo Oppenheim, June 7, 1969* (Chicago, Oriental Institute of the University of Chicago, 1969), p. 135.

35. Harris, *Studies...Oppenheim*, p. 127, counts twenty-two different *nadītu*’s who bore this name.

36. UMM H 9 (pl. 39) line 3. It is not at all excluded that she may be identical with the šabsūtu of our text, as the date of that document is Aṣ 17+b, but the evidence is of course inconclusive. It is also well known that *nadītu*’s are often not identified by their title, and we only learn about their true status from context, inference, fuller references, or by implication from their names.

37. The context *ina nīši* “among humankind” does not suggest that a supernatural demonic spirit is meant, at least in this passage.

38. Perhaps this is the implication of the otherwise obscure line 290: šabsūtum ina bit qadištī lihdu “may the midwife rejoice in the house of the *hierodule*.” For *qadištū*, the later Assyrian recension has *ḥarištū* “woman in childbirth” which, though less enigmatic, may nevertheless be secondary. We know that the *qadištū* in the Old Babylonian period was a hierodule of no mean rank—in Sumerian literature the title NU.GIG (= *qadištū*) is the most popular epithet of Inanna—who was allowed to bear children (not necessarily in marriage), since she popularly served as a wet-nurse in this period. Note also that there was in this period a NU.GIG by the name of Iltani, VS, 7, 10–11. It may well be worth noting here that the epithet “wise” applied to a woman often has the specific denotation of “midwife.” Thus in Mishnaic Hebrew *ḥakamah* “wise woman” actually means “midwife” (Mishnah *Shabbat* 18:3, *Rosh Hashanah* 2:5). Also Heb. *hayyāh* can have the same meaning, as in the Bab. Talmud. *Kiddushin* 74a. S. Mandelkern in *Veteris Testamenti Concordantiae Hebraicae atque Chaldaicae* (4th ed., Jerusalem, 1959), 1, 387, suggests that *ḥayot* in Exod. 1:19 may well convey the notion that the Hebrew women in labor needed no midwives (*meyallēdōt*), as they were able to perform that function themselves; he also cites the French for “midwife,” *sage-femme*. (I owe these observations to Dr. Jeffrey Tigay.) One may therefore wonder whether the common epithet *erīštū* “wise” given to the goddess Mami/Nintu might not similarly bear an allusion to her as the prototypical midwife. Similarly, the use of *bulluṭu* in the passage quoted above in note 33 may bear comparison with the meaning of Heb. *hayyāh* and the entire section in Exod. 1:16 ff.

39. The name of the scribe who wrote the Sippar version of the epic, kū-Aya, suggests that he (or she?) had some connection with the Šamaš-Aya cult in which these women were so prominent.

women were to perform this socially useful role after the Flood, while remaining childless themselves in order to keep the population down. Thereby they prevented the recurrence of an evil (overpopulation) which had prompted the gods to resort to the drastic measures of pestilence, famine, and flood that would have brought mankind to extinction, had it not been for the wily counteraction of Enki and his client Atra-hasīs.⁴⁰

With respect to the categories of personnel connected in one way or another with cultic institutions, the Kish tablets shed some light on the women denoted by the Sumerian title MÍ.SUḪUR.LÁ(L): Akk. *kezertum/kezrētu* (pl.), and the men who were their supervisors or intendants, the UGULA MÍ.SUḪUR.LÁ.MEŠ: *wakil kezrēti*. The information previously available was very limited,⁴¹ and the most explicit information about the activities of the women going under this title came from a few lexical and literary sources—the latter exclusively from post-Old Babylonian materials—which presumed them to be a class of hierodules along with the *harimtu*- and *šamhatu*-women, who are unequivocally considered to be prostitutes and harlots. The information provided by the texts published here does not offer any direct evidence concerning the activities engaged in by these women, cultic or otherwise, but we do learn that a *kezertu* could be married.⁴² In all likelihood, the extramarital sexual activity—if this is indeed what it was—of these women was not of a “professional” nature, nor is it likely that they were engaged in it on a fulltime basis. Nevertheless, the revenue resulting from this activity was to some degree under the control of the UGULA of the *kezrētu*-women, who exercised this control as a *paršum*, i.e. a prerogative or benefice granted by the crown in the form of exclusive “franchises” (*harrānum*) demarcated along well-traveled rivers and canals.⁴³ These prerogatives were treated as private assets which could be leased to third parties or be subject to compacts limiting the extension of their benefits in certain ways.⁴⁴

All the texts bearing on the *kezrētu*-women and their intendants, including the pertinent material in the Szlechter volume and the literary and lexical references, must be subjected to a careful analysis and synthesis before one may arrive at any conclusions, however tentative, concerning the precise functions exercised by these persons. Such a study cannot be reasonably incorporated within the bounds of the present volume, and will have to be reserved for a separate occasion. The most that might be ventured at

40. Note that Nintu, as the personification of childbirth, is again invoked just before the all-important passage at the beginning of III col. vii 1 ff., and while only the ends of the lines are preserved here, it is clear from the traces that the theme at this point is the post-diluvian dispensation of childbirth. It should be recalled that until the publication of the recently recovered Old Babylonian text of Atrahasis it was widely believed that the epic was used as, if not specifically adapted for, recitation as a kind of incantation at actual childbirth.

41. See Renger, *ZA*, 58 (1967), 188.

42. Cf. Nos. 311, 312, 315, 327. That these texts involve remunerative activities of *kezrētu*-women will be shown elsewhere.

43. Cf. Nos. 297, 401, 236 + 326, to which one must add also UMM G 18. Szlechter misread most of the crucial lines in this text, misconstruing its nature entirely. He misread MÍ.SUḪUR.LÁ in every occurrence as ŠUDÚG. Re-editions or retranslations of all pertinent Manchester tablets, as necessary, will be given when the subject of the *kezrētu*'s in its entirety will be reviewed in a separate article.

44. See especially No. 202.

present is to say that the evidence is very disparate and almost always obscure. But if it is recalled that the literary allusions all derive from a time when the institution of the *kezrētu* was long since dead, it would not be surprising if the evidence from the Old Babylonian period, when the institution was still alive, should cast a new light upon it or offer some meaningful perspectives for it which may enable us better to evaluate the later understanding of the term as denoting some class of prostitutes.

A distinctive feature of the religious establishment in Kish during the late Old Babylonian period, as reflected in the documents published here, is the close association of the larger segment of it with the city of Uruk, which at this time was either in eclipse, or—more likely—was under the domination of the “Sealand” dynasty. Most noticeable is the existence in Kish at this time of two cult centers of Inanna, that of Inanna of Kish (cf. Nos. 20:17, 83:5), which is of course to be expected, and Inanna of Uruk (Nos. 90:rev. 10, 96:19, 20). To the latter should also be added instances where the cult of An and Inanna is served by a single priesthood, among whom the *išib:isippum*-priest⁴⁵ was prominent at Kish, as in Nos. 331:3 and 435:3 (also lines 5, 7, 8, 10), where the deity (or deities) is explicitly named as AN-^dINANNA of Uruk. It must be presumed that in all instances where this combined cult is mentioned, Inanna must be understood as representing the Uruk goddess rather than the one of Kish. Earlier in the Old Babylonian period a combined cult of An and Inanna flourished in Uruk itself. It was located in the Eanna temple, and among its personnel there was also the *išib*-priest.⁴⁶ The cults of Inanna of Kish and of Inanna of Uruk were each under the administration of a separate *SANGA:šangūm*, i.e. “high-priest,” cf. No. 20:17 vs. No. 96:19. Perhaps even more telling is the evidence for the cult of Kanisurra at Kish, also under the leadership of a *SANGA*, cf. Nos. 46:11, 219:13?, 296:18, 315:8, and 527:13. This deity, identified as the “daughter of Nanā,”⁴⁷ is otherwise known from context only in Uruk where the name occurs apparently as a toponym⁴⁸ and may well be connected with a temple dedicated to this goddess. Furthermore, there is extant an inscription of AN-am—presumably the king of Uruk who was the earlier contemporary of Sin-muballit—dedicated to Kanisurra.⁴⁹ That the goddess Nanā herself, closely associated with An and Inanna in Uruk—they formed a triad in the Old Babylonian period⁵⁰—is also one of the major deities of Kish is perhaps less surprising.⁵¹ Not only does she have a cult at Kish

45. One of the classes of exorcist priests who served in the temple, of higher rank than the (*w*)*āšipum* who served the populace; see Renger, “Untersuchungen zum Priestertum in der altbabylonischen Zeit,” part 2, *ZA*, 59 (1969), 124 ff. and 223 ff. As Renger notes (*ibid.*, pp. 122 f.), the three terms are etymologically identical, the Sumerian being an old loan from Akkadian.

50. Falkenstein, *Bagh. Mitt.*, 2 (1968), 31 ff.

51. Is the name of this popular goddess—whose worship survived into the Roman period—to be explained as a colloquial “Kosename” based on the popular pronunciation of the Sumerian (N)inanna?

supervised by a SANGA, but there is a high incidence of the use of her name as the theophoric element in the personal names of both men and women. Two of the UGULA's of the *kezrētu*-women have names compounded with this element (Idin-Nanā and Gimil-Nanā) and it would appear that the woman Nanā-ummī (No. 52:3 f.) was a *kezertu* herself. This suggests the possibility that the women serving in this capacity were under the tutelage of Nanā.

The occurrence of the deity SAG.KUD as the tutelary deity of the owner of the seal A of No. 521 may also prove significant. SAG.KUD is listed in the circle of An in the main text of the great god-list AN:*Anum*, where in i 83 he is identified as the ZABAR.DAB official of An.⁵² In the Old Babylonian god-list in Berlin, VAT 7759, the section in lines 20 ff. appears to be devoted to Inanna and her circle. Nanā occurs in line 20, and Kanisurra in line 22, followed immediately by Latarak in lines 23 f. The occurrence of the god Latarak as a patron deity in seal A of No. 308 and as the theophoric component in the name Awil-Latarak⁵³ (wr. LÚ.^aLÚ.LĀL) in 68:12 is therefore of interest, especially since he also appears in a list of deities mentioned in an Old Babylonian tablet from Uruk.⁵⁴

Finally, one might take note of the goddess Ešurritum (var. Ešurrātum) occurring as the theophoric component in the name Warad-Ešurritum. If the different occurrences of this name refer to only one individual, then he is the one identified in No. 329:9 (and in the seal impression) as a *galamahkum*-priest. The divine name can only be an epithet of Inanna as "the one of Ešur-ra," which must certainly be Ešár-ra.⁵⁵ In the great god-list AN:*Anum*, tablet IV i 15⁵⁶ [dNIN].É.ŠÁR.RA:be-lit Ešár-ra occurs in the section devoted to the epithets of Inanna identifying her by cultic loci, e.g. of Eanna (lines 12, 13), Nippur (line 16), Kish (line 17), Dilmun (line 18), Nineveh (line 19). It is of course possible that the Ešarra referred to in this line may allude to a later center of Inanna, as in Nineveh, but one cannot ignore in this connection the existence of a temple of this name in Uruk, although that was properly the temple of An.

In sum, the worship of Inanna of Uruk in Kish might of itself not assume major significance, but the evidence from the tablets here published indicates that it was not an isolated phenomenon, but that the major part of the An-Inanna cultic circle—if not the whole of it—was established in Kish in late Old Babylonian times. At what point in time this "transfer" occurred—if that is what actually happened—our evidence does

52. Cited after the unpublished edition of the god-list by R. L. Litke, "A Reconstruction of the Assyro-Babylonian God-Lists AN:*Anum* and AN:*Anum ša amēli*," unpubl. Yale Ph.D. dissertation, 1958, p. 50. In K.4839 (CT, 25, 11) ii 34 he is identified with Ninurta; cf. further, F. R. Kraus, "Nippur und Isin nach altbabylonischen Rechtsurkunden," *JCS*, 3 (1951), 75.

55. With vowel reduction caused by the gentilic affix -itum; one wonders whether the reading of *An-šár* as *Aššur* in the Assyrian copies of Enuma Elish was not suggested by a similar phonetic phenomenon.

56. Litke, AN:*Anum*, p. 169.

not permit us to say, nor do we have any clue as to the political, religious, and historical circumstances which led to this development.⁵⁷

The ensuing catalogue is designed to call attention to the key features of each text, its characteristic phraseology, and/or unique or nonroutine terminology wherever it appeared noteworthy, except, of course, for the letters, which are simply identified as such. This procedure is intended to take the place of transliterations and translations of the texts *in extenso*, which obviously can not be accommodated in a volume of this nature. It has nevertheless seemed appropriate to direct special attention to a few of these texts in light of the special interest they bear for historical or institutional problems in the Old Babylonian period. It is hoped that in this combined manner the attention of scholars may be more quickly directed to texts of more than routine interest.

No. 19

Note that the first two names, Ukkukku and Halbirindah, are Elamite and Kassite respectively, although not so identified in the text itself. Line 5 appears to me incomprehensible. One expects a personal name here after A.šā, but there appear to be too many signs for that. I read (very tentatively): UKU (or AD) ša (or ta) a-na TI GA ? na bi ir te (or tu?) ni-iš / ID-gu-ú.

No. 28

It is unfortunate that in this litigation lines 14–16 are so seriously damaged.

Translation: With respect to a cow and its nursing calf belonging to Ušriya son of Warassa concerning which Rīš-Nabium son of Sin-wēdu deposed thus: “The stolen cow and its nursing calf—Marduk-mušallim the shepherd will be coming this side of

57. It is perhaps significant, in this connection, that among the Kish texts there are five occurrences of the name Uruk-liblūt “May Uruk live (on).” In at least one instance (No. 297) the person so named is the father of the ISIB of AN.^dINANNA, and in other cases the texts include other high cultic personnel as principals or witnesses. (It is not impossible, given the dates, that all the references are to one individual, whose father’s name was Adallalum.) Are we to read into this a feeling of yearning for the forsaken cult center of the South?

the Zilakum-canal (and) I and Awel-Išum son of Marduk-mušallim will (also?) come. Within ten days he will produce a cow and nursing calf. If within ten days [*he does not produce* a cow] and nursing calf...” x [son of] Ibni-Amurru, “Captain” of the Amorites pronounced the directive: If he (i.e. Marduk-mušallim) does not produce it, Riš-Nabium son of Sîn-wēdu... will hand over his wife to Ušriya. Two witnesses, date: Tammuz, 12th? day, 28th year of Ammiditana.

It is not clear from the information supplied what relation Riš-Nabium had with the shepherd Marduk-mušallim who was presumably responsible in the first instance for the stolen animals, and it is not certain either that Awel-Išum is the son of the same Marduk-mušallim. The directive,^a apparently given by the Amorite Captain acting in a quasi-judicial capacity, is that if the lost animals (or their replacement) are not returned within the specified time, Riš-Nabium is to hand over his wife to the owner of the lost animals (for debt servitude or permanently?), a startlingly severe penalty, considering that R. was not directly responsible for the theft. But there may have been particular circumstances, which the text does not mention, that might have justified such a decision.

a. See also 329:5 for *qabām šakānum*, there by a diviner (*bārū*).

No. 96

It is unfortunate that so little remains of this large document which apparently traced dispositions of various parcels of real estate belonging to high cultic officials, male and female, back through the time of Abi'ešuh (line 12) and Sin-muballit. The year-name of the latter mentioned in line 7', [...] BÀD ŠI.RA.MAH^{ki}, may represent the name for Sin-muballit's twentieth year, which has thus far remained unknown. It is virtually identical with the name for Hammurapi's fourth year, which may create ambiguity in dating texts showing this formula where the king's name is not mentioned, as e.g. *CT*, 48, 52.^a The document apparently involved boundary changes; see lines 5' (... *i-tu-ú la-bi-ru-tum* “old boundaries”), and line 29' (*i-tu-ú eš-šu-tum* “new boundaries”). The obverse ends with an enigmatic reference to enemy troops who “captured” (or “arrived”) . . . , after which the text is virtually useless.

a. The fact that the principals in that document reappear in *VAB*, 5, 222 of Hammurapi 28 does not clear up this ambiguity.

No. 192

This text, in the form of a protocol, might in modern terms be considered a “birth certificate,” hardly a standard Mesopotamian documentary type, so that one must assume that special circumstances dictated the drawing up of this unusual document.

^d*Marduk-BI.DA.KE*₄

Translation: On the 8th day of the month of Ab in the 5th year of King Samsuditana (5–8) Amat-Bau, her mother, gave birth to Amat-eššešim in the “New House” on Nanā Street. (9–11) She (i.e. the mother) is the slave-woman of Ruttiya the *ugbabtu* of Zababa, her mistress. (12–13) She (i.e. Amat-Bau) will be responsible to (the goddess) Nanā for her obligation. (14–16) She will not provoke her mistress Ruttiya to rage. Dated: Month of Ab, 8th day, 5th year of Samsuditana.

The most significant lines in this document are 14–16. The subject cannot be the newborn girl, since the document was executed on the very date of her birth. Obviously, then, the subject must be Amat-Bau, the slave-woman of Ruttiya. But what can have been the circumstances that required this unusual admonition? One is almost compelled to assume that Ruttiya was legally married but that, like a *nadītu* who in the same situation was not expected to bear children of her own, she could offer her own slave-woman to her husband for the purpose of producing offspring, as provided in LH §§ 144, 146. In this eventuality there apparently always lurked the danger that the concubine-mother might turn insolent against her erstwhile mistress and presume equality with her. This prospect is explicitly dealt with in LH §§ 146–47, which allow the mistress to reduce the concubine to the status of slave if she had already borne children, and to sell her outright if no children had as yet been produced. The laws of Ur-Nammu §§ 22–23 apparently deal with the same contingency.^a *CT*, 48, 48 provides a close parallel to the present text. In that text, a girl, Sabītum by name, is purchased from her parents by Ahāssunu the wife of Warad-Sin; the text specifies that Sabītum has the status of slave-woman to Ahāssunu and wife to Warad-Sin (lines 7–8).^b Sabītum must be ever responsive to the cares and moods of her mistress.^c The contract further stipulates (lines 12–15) that: “Should she (i.e. Sabītum) ever cause Ahāssunu any vexation, she may shave her and sell her for money.”^d This is strikingly close to lines 14–16 of our present text, and suggests a similar background. Should this analysis hold, we might also be able to suggest an explanation for lines 12–13, which would otherwise remain obscure: the responsibility of Amat-Bau to the goddess Nanā would consist of aiding her mistress to carry out the latter’s function as an *ugbabtu*, by washing her feet, carrying her chair to the goddess’s temple,^e or providing other services in support of her mistress’s cultic role.

This reconstruction is obviously based on the presumption that an *ugbabtu*—like some *nadītu*’s—could have been married, for which we thus far have no direct evidence. I believe, nevertheless, that this was the case, especially in view of the stronger evidence

already cited above that there may have been little distinction between these two "priestess" classes, and that the two terms were even interchangeable to some degree.

- a. *JCS*, 22 (1969), 70, 79.
- b. The purchase was specifically for concubinage, as a *terhatum* was paid, lines 16–20.
- c. Read lines 9–11: *ze-ni A-[ha-zu-nu i-z]e[-ni] / [sa]-la-mi-ša i-sa-li-im* "When A. is in a temper she shall be in a temper, and when (A.) is in a benign disposition, she shall act benignly"; cf. *VAB*, 5, 4:21–23, and 5:6–8, which in many respects parallel *CT*, 48, 48.
- d. *u₄-um li-ib-bi A-ha-zu-nu u-ša-am-ra-šú u-ga-la-ab-ši-ma a-na kaspim i-na-di-ši*.
- e. Cf. *VAB*, 5, 4:17–21, 5:9–10.

No. 378

The special interest of this herding contract lies in the explicit stipulation in lines 7–9: *a-na ha-am-si-im / a-na re-ú-tim / pa (!)-aq?-da* "they (i.e. the animals) were put under *charge*^a (of the shepherd) on a 20 percent basis."^b This statement confirms the conclusion I had reached on the basis of other evidence that the rate of division of the increase in a flock given for herding was 80:20.^c

- a. The reading of the signs here is tentative, based on the standard phraseology in such contracts (e.g., No. 434:6). But the difficulty is that the shepherd to whom the animals are entrusted is not named, as he should be at this point, since *paqdā* would normally follow the name of the shepherd. If, therefore, it is to be assumed that the destroyed lines 10–11 are to be restored as: [*a-na PN SIPAD*] / [*pa-aq-da*], then my restoration of line 9 is to be rejected, and I would have no alternative suggestions for reading the traces.
- b. Literally, "on the basis of one-fifth," i.e. the shepherd is to keep one-fifth of the newborn animals as his reward and return the other four-fifths to the owner of the flock.
- c. *JAOS*, 88 (1968), 38 ff.

CATALOGUE

In the description of the texts important words appear in parentheses, while phrases describing the category into which the text falls follow the semicolon. The characteristic phrases appear only at the first occurrence of the category and are simply cross-referenced by text number thereafter.

* Ae = Abi'ešuh; Ad = Ammiditana; Aş = Ammişaduqa; Sd = Samsuditana. The sequence of the year-names of Ae (only partially established) follows that given by Goetze in *JCS*, 5 (1951), 98 ff. For Ad and Aş the sequence followed is that of Ungnad in *RLA*, 2, 187 ff., with the exception of No. [267] 17+e = Aş Yr. 1. (After year 16, the sequence for Aş is not established.) For Sd the year sequence is that of Landsberger and Feigin in *JNES*, 14 (1955), 187 ff., and Finkelstein in *JCS*, 13 (1959), 39 ff.

* Mistake for GU₄?

† Unknown date formula.

Note: For No. 12 (YBC 4980) YBC 4983 is duplicate. No. 37 (MLC 220) has a case (MLC 219) with duplicate text. No. 372 (YBC 5665) includes case, uninscribed except for traces of one line. No cases are preserved for any other tablets.

INDICES

PERSONAL NAMES

The following conventions have been used in some of the names: *Ipqu* = SIG, ^d*Nabium* = ^d*AK*, ^d*Sin* = ^d*EN.ZU*, *Sin* = XXX, ^d*Ištar* = ^d*INANNA*, *Ištar* = EŠ₄.DAR. Date formulae are indexed only when they appear in the body of the text. All non-Sumerian names have been italicized, including those which are not Akkadian. For names written entirely in sumerograms no uniform system of transcription was followed, since it is clear that the name of one and the same individual could be written—even in the same text—either in Sumerian or Akkadian (at least in part). All of these being among the most common of names, the reader should have no difficulty in locating them in the list, whether entered as Sumerian or Akkadian. Where no additional evidence is present for the actual pronunciation, such entry is to be understood as without prejudice as to whether the name was pronounced as Sumerian or Akkadian. Note: (w) = witness.
